CARMEL, CALIFORNIA, U. S. A.

PLEASE READ BEFORE ORDERING

In California sow wild flower seed at the beginning of the rainy season. If the land can be watered, seed may be sown up to the end of April. In eastern gardens sow in Spring as soon as the ground is workable. Rake the seed lightly into ground which has been dug or plowed and then smoothed over.

For the present it is necessary for me to manage alone and other work has to be done to keep the seed business going. Therefore I must limit order-filling to the months of September, October, November, February and March. All orders will be acknowledged when received.

Postage is prepaid in U.S.A. only. Seeds are insured only at the customer's request. As valuable orders have been lost in the mail I take no responsibility for safe carriage. Terms are cash with order or I will send C.O.D. if one-third is paid as a deposit. Please use enclosed order blank.

I send honest seed but because I cannot control the growing condition of this seed I give no guarantee of behavior. The smallest acceptable order is fifty cents. Though some species in the last catalog are out of stock, that list still holds good. I have small quantities of many unlisted species.

Seeds 25 cts per packet unless otherwise indicated.

Trade packets. 50 cts.

Prices subject to change.

LESTER ROWNTREE

The following SHRUBS are evergreen except where marked d. for deciduous. Some shrub seeds are sent out in the pod as they lose their vitality when shelled.

CARPENTERIA californica, Bush Anemone. Large white flowers. 6 ft.

CEANOTHUS are notorious hybridizers and it has been necessary, this year, to collect some seed from wild flower gardens. This seed may produce hybrids but as wild lilac hybrids are more vigorous than their types and are often extremely interesting and lovely, I do not consider this a drawback. Field collected seed is marked with an asterisk.

Here is a seed list of **EXOTIC SPECIES AND HYBRIDS** which, like most Californian natives, are able to come quite happily through several weeks of abandon. The seed of these wild flowers of other countries has been collected from self-sows in a neglected garden. With the coming of rain, scatter the seed where the plants are to grow. In order to become established stands they may need some water the first summer. Perennials unless otherwise stated.
